W. N. T. C. Campus Station

David Karaman
Student Manager

The campus radio station was greatly aided in its past development here. Not to its mindless work, it is an idea station, will support organization which shows its own, mental, watching opportunities are limited, from both Cleveland and the State University Teachers College. Its purpose is to provide for the students, the latest in available training, information, and to serve as a training ground in public relations, management, and in the community.

A most popular feature with the students has been the station's policy of broadcasting to some student subjects, corporate as possible. W. N. T. C. has no a procedure by which, serving all forms and even Cleveland/teachers, points as well as those who, basketball, and the other forms, games. The quality of education has been enhanced by the addition of a student station to the station's equipment.

The Board of Directors, composed of the heads of the various station departments and the station managers, will be the central and policy-making group for the benefit of the station.
